

Track&Tell™ in the Home

Next Generation
Behavioural Monitoring
& Falls Prevention

Helping to keep you safe
and at home longer!

We can help you stay “on track!”

- *Monitor your movements using new non-contact 3D cameras & sensors*
- *Move Inside & Outside using GPS Tracking and Home wireless sensors*
- *Checks your appointments and schedule and provides “useful” reminders*
- *Supports normal routines – weekdays and weekends, to home, shops, family*
- *Automatically contact your primary carers or if need arises Emergency options*

- *Intelligent Monitoring - Inside or optionally Outside*
- *Identify if you are lying “In bed” – or “On the floor”*
- *Falls Prevention - Detect “Unstable” movement patterns*
- *Behavioural Monitoring- Forgot shower, tablets, meals, car*
- *Detect Repetitive actions, odd sleep patterns, body temp*
- *24x7 monitoring - yet it provides privacy!*

Track&Tell™

What can I do to stay at home longer but safely?

- Track&Tell gives me 24x7 "Peace of Mind" without significant impact on my privacy or independence

Next Generation Behavioural Monitoring & Falls Prevention

- Intelligent systems and Smart non-contact 3D sensors - look for normal & abnormal posture, actions, activities: On floor, not moving, abnormal sleep

Predictive not just Reactive Monitoring & Alerts

- Detects and reminds me of abnormal or dangerous situations, forgotten events, incomplete tasks

Intelligent Escalation

- Will contact & notify my primary Carers/Support - but if not contactable will escalate to alternate care options/authorities

Non-intrusive personal real-time support & reminders

- Intelligently uses mobile or "Smart Watch" to unobtrusively reminds me of events, incomplete tasks, diary activities - including time to prepare

Track&Tell™ Benefits

Helps and Supports Individuals with Personalised Care & Monitoring

Additionally supports the Care Agencies - delivering automated support options

Delivers security & comfort to clients and their families - by providing a safer & "Smarter" home environment
